

An Open Content, Open Source Technology Platform for Multilingual Sign/Text Storybooks and Digital Games

- World Around You (WAY) is a technology-based multi-lingual innovation with the goal to increase global literacy outcomes for deaf children by providing greater access to sign languages, early and late grade reading materials, reading instruction, and digital games.
- WAY allows for the creation of multilingual signed stories with written text to be created and distributed across the Internet.
- WAY promotes community engagement by allowing contributors to share and publish stories, including deaf-related stories, collaboratively.
- WAY reinforces literacy for deaf children and sign language documentation of local, regional and national sign languages by Deaf people.

WAY: Reader Interface

WAY Digital Game: Spot the Sign - Memory Game

COMMUNITY ENGAGEMENT ♦ STORYTELLING ♦ DIGITAL GAMES ♦ FREE OPEN SOURCE SOFTWARE
